

Ardrox 6375

Compressor Wash concentrate

Description

Ardrox 6375 is a liquid alkaline product formulated to clean the compressor sections of gas turbine engines. **Ardrox 6375** is a blend of detergents and emulsifiers, it removes atmospheric soils, oils, carbon and salt deposits during 'in-situ' hot-fired and cold motor washes. Regular cleaning with **Ardrox 6375** helps maintain peak engine efficiency and reduces maintenance and fuel costs. **Ardrox 6375** is compatible with recognised antifreeze materials used during cold weather cleaning.

Method of Use

Ardrox 6375 should be diluted with demineralised water. If demineralised water is not available, then use **Ardrox 6375** RTU which is the ready to use formula.

Type II, ColdWash.

Mix 1 part **Ardrox 6375** with 4 parts demineralised water. Apply by spray; pressure and flow rate will depend upon the engine type and degree of contamination. After a suitable contact period the engine should be rinsed with demineralised water. Unless it is to be used immediately, the engine should be started and run at idle for a few minutes to aid drying, or be protected by the spray application of Ardrox 3961 water displacing oil.

Type III, Hot-Fired Wash.

Mix 1 part **Ardrox 6375** with 4 parts demineralised water. Apply by spray; pressure and flow rate will depend upon the engine type and degree of contamination. After a suitable contact period the engine should be rinsed with demineralised water.

NOTE: Always apply **Ardrox 6375** according to the procedures given by the engine manufacturer.

Effects on materials

Ardrox 6375 is safe on all aircraft metals, plastics, windows, etc.

Chemical and Physical Properties

Appearance:	Yellowish coloured liquid.
Density:	Approx 1.0 g/ml at 20°C
pH (neat):	9.0 – 9.5

These are typical values only and do not constitute a specification.

Packaging

Available in 20 litre containers

Safety, Transport and Storage Information

Please refer to the Material Safety Data Sheet.

Issue Date: April 2015
